BARGAIN OF THE MONTH

OCTOBER 1952

During the past year several hundred Ryerson Customers have been introduced to a simple and inexpensive method of adding some of the finest hybrids to their collections, in the COMMUNITY POT stage. HOW? They bought their **Community Pot Lots** of seedlings "Bare Root" and did their own planting in my **POTTING MIXTURE** that flies to them along with the seedlings.

Now, don't just sit back and say: "Oh, I couldn't possibly plant and grow seedlings that small!" How do you know you couldn't, until you have tried? Even if you have tried and failed with average, spindly little seedlings out of flasks, it doesn't mean you couldn't succeed with sturdy "transplants" flown to you "Bare Root" from South Florida!

You won't need a magnifying glass to plant these seedlings! Leaf length averages 1/2-inch or more. Every seedling has good roots to hold it in the potting mixture.

To introduce more of you to the thrill of accomplishment you can have only when you succeed in planting and growing a COMMUNITY POT, I'm offering this "Bargain of The Month."

Will you gamble \$5.00 to prove your "green thumb" is better than you thought it was?

Order before November 1st, and \$5.00 will bring YOUR CHOICE of any COMMUNITY POT. LOT (20 or more seedlings) on this page.

I guarantee your Bare Root seedlings will be delivered in perfect condition, Air Mail Prepaid.

No limit as to the number of "lots" you may order at this price, but please don't ask for LESS than 20 seedlings of any cross!
